ME AS A

VIDEO EDITOR

My work as an editor will involve:

Receiving a brief, and maybe an outline of footage and/or a shot list, script, or screenplay

Assembling all raw footage, with camera shots either recorded or transferred onto video tape in preparation for inputting into the computer

Inputting uncut rushes and sound, and synchronising and storing them into files on the computer

Digitally cutting files to put together the sequence of the film and deciding what's usable

Creating a 'rough cut' (or assembly edit) of the programme/film and determining the exact cutting for the next and final stages

Reordering and fine-tuning the content to ensure the logical sequencing and smooth running of the film/video.

My Additional tasks may include:

Overseeing the quality and progress of audio and video engineering and editing

Experimenting with styles and techniques including the design of graphic elements

Writing voiceover/commentary

Suggesting or selecting music

Online editing - depending on your role you may also finalise technical aspects such as correcting faulty footage, grading and colouring and adding special effects.
